Summary

Highly motivated and results-oriented Software Engineer with 4+ years of experience in designing, developing, and deploying robust and scalable web applications using React.js, Node.js, MongoDB, and AWS. Proven ability to lead frontend development, improve user experience, and leverage cutting-edge technologies to deliver innovative solutions. Certified AWS Solutions Architect with a strong track record of exceeding expectations and achieving quantifiable results.

Skills

Programming Languages: JavaScript, TypeScript

Frameworks/Libraries: React.js, Node.js

Databases: MongoDB

Cloud Platforms: AWS (Certified AWS Solutions Architect - 2022)

Other: Responsive Web Design, REST APIs, Agile Methodologies, Git, Markdown

Experience

Software Engineer | XYZ Corp | January 2020 – December 2023

Led frontend development for three major company projects, resulting in a 20% improvement in user experience as measured by decreased bounce rate and increased time on site. Specific improvements included implementing a new navigation system and optimizing page load times. Developed and maintained over 10 key features for the company's flagship product using React.js, Node.js, and MongoDB.

Collaborated with backend engineers to design and implement RESTful APIs.

Mentored junior developers, providing guidance on best practices and code quality.

Deployed and managed applications on AWS using best practices for security and scalability.

Frontend Developer | ABC Ltd. | July 2018 – December 2019

Developed and maintained responsive web applications using React.js, contributing to the development of 5 key features for client projects.

Implemented unit and integration tests to ensure high code quality and maintainability.

Collaborated with designers and product managers to translate designs and requirements into functional code.

Projects

E-commerce Website

Developed a fully functional e-commerce website using React.js for the frontend, Node.js for the backend, and MongoDB for the database. Features included user authentication, product browsing, shopping cart functionality, and order processing. Deployed the application on AWS.

Personal Blog Platform

Built a personal blog platform with support for Markdown formatting and real-time commenting

using React.js and Node.js. Implemented features such as user authentication, content management, and search functionality. This project showcases proficiency in full-stack development and real-time applications.

Education

B.Tech in Computer Science | Massachusetts Institute of Technology (MIT) | 2018

Achievements & Certifications

Certified AWS Solutions Architect (2022)

Hackathon Winner: Developed an AI-powered chatbot that increased user engagement by 25% as measured by a 25% increase in daily active users during the testing period. The chatbot was built using .
