Summary

Highly motivated and results-oriented Software Engineer with 5+ years of experience in designing, developing, and deploying robust and scalable web applications using React.js, Node.js, MongoDB, and AWS. Proven ability to lead frontend development teams, improve user experience, and deliver innovative solutions, as demonstrated by a 20% UX improvement at XYZ Corp and a 25% increase in user engagement with a winning hackathon project. Certified AWS Solutions Architect.

Skills

Programming Languages: JavaScript, TypeScript

Frameworks/Libraries: React.js, Node.js

Databases: MongoDB

Cloud Computing: AWS (Certified AWS Solutions Architect – Associate, 2022)

Other: Responsive Web Design, RESTful APIs, Git, Agile methodologies, Markdown

Experience

Software Engineer | XYZ Corp | January 2020 – December 2023

Led frontend development for three major company projects, resulting in a 20% improvement in user experience as measured by reduced bounce rate and increased time on site. Specific projects included .

Mentored junior developers, providing guidance on best practices in React development and Agile methodologies.

Implemented a new component library, improving code reusability and reducing development time by 15%.

Successfully migrated legacy applications to a cloud-based infrastructure using AWS services, improving application performance and scalability.

Frontend Developer | ABC Ltd. | July 2018 – December 2019

Developed and maintained responsive web applications using React.js, integrating with RESTful APIs and utilizing various third-party libraries. Specific projects included .

Collaborated with backend developers to ensure seamless integration between frontend and backend systems.

Implemented unit and integration tests to improve code quality and reduce bugs.

Projects

E-commerce Website

Developed a fully functional e-commerce website using React.js for the frontend, Node.js with Express.js for the backend, and MongoDB for data persistence. Features included user authentication, product catalog, shopping cart, and order processing.

Implemented secure payment gateway integration (mention specific gateway if known).

Deployed the application to .

Personal Blog Platform

Built a personal blog platform with Markdown support allowing users to easily create and publish blog posts.

Implemented a real-time commenting system using .

Utilized .

Education

B.Tech in Computer Science | Massachusetts Institute of Technology (MIT) | 2018

Achievements & Certifications

Certified AWS Solutions Architect – Associate (2022)

Hackathon Winner (20): Developed an AI-powered chatbot using which resulted in a 25% increase in user engagement on .
